

AHAM/ENERGY STAR Air Cleaner Meeting at the International Housewares Show

For ten years, ENERGY STAR, a voluntary government-business partnership, has placed its distinctive label on energy-efficient products that use less energy. As such, the ENERGY STAR can now be seen on more than 30 different product categories. Due to increasing public interest in air quality issues and continued industry support, EPA is considering expanding this list of qualified products to an ENERGY STAR program for air cleaners.

Join us during the International Housewares Show to learn about the potential energy savings that this product offers and its' potential to earn the ENERGY STAR. This is your opportunity to discuss your interest in, and concerns, with an ENERGY STAR air cleaner program.

WHO: EPA; AHAM; Air Cleaner Manufacturers

WHERE: The International Housewares Show
Room E253d in Lakeside Center Building at McCormick Place, Chicago, IL

WHEN: Tuesday, January 14th 9:00–11:00 AM

Andrew Fanara, EPA, will be presenting on the following topics;

- Overview of ENERGY STAR Program
- Benefits and Successes of ENERGY STAR
- EPA's Interest in Air Cleaners
- Savings Potential of Air Cleaners
- EPA's Product Development Process and Next Steps

Following this presentation, EPA will open the floor for discussion and answer any questions you may have regarding ENERGY STAR.

If you cannot attend the meeting, but would like to have a discussion with EPA, contact Milanga Abeysuriya, at (202) 862-1260.

Hope to see you there!
